ICATO CIRC A 22

I. BACKGROUND

The European Productivity Agency was established in 1953 as a "clearing house" and coordinating body within the International Organization for European Economic Cooperation. (OEEC) Since that time, EPA has been active in assisting European productivity centers by supplying documentation and information, organizing seminars, providing technicians, organizing teams of participants, and producing audio-visual aids and training materials. EPA has also developed long-term plans in scientific assistance to under-developed areas in Europe.

ICA/W has for some time been concerned with (1) providing continuation of ICA sponsored Third Country Training in Europe despite the progressive withdrawal of ICA offices and personnel from the European countries ~~xxxxxxxxx~~ where training is usually given and (2) the stimulation of European countries to undertake technical assistance programs for the benefit of less developed non-European as well as European countries, independent of both U.S. and U.N. TC/TA programs.

Assumption by EPA of an operational role in the ICA-sponsored Third Country program has been given careful consideration by ICA/W and USRO, as a ~~xxx~~ nearly complete solution to (1) above, and a further step toward (2). Accordingly, a proposal to EPA to assume this responsibility was made by ICA, in order to take advantage of the considerable knowledge of the OEEC and the EPA as to the nature and quality of the many training facilities in Europe: to profit from the specialized experience of the EPA in the administration of technical assistance programs and projects; and because of the interest of the United States in strengthening the EPA as the coordinating mechanism for the U.S. financed technical cooperation activities in Europe.

II. THE ICA PROPOSAL AND ITS ACCEPTANCE BY EPA

On May 12, 1958, in a letter to the Secretary General of OEEC, USRO formally proposed that OEEC/EPA assume operational responsibility for the Third Country Training Program in Europe, under the terms and conditions set forth in the letter and the Annexes thereto. On June 12, 1958, the Secretary General in his reply to the USRO letter accepted the ICA proposal on behalf of the OEEC and reaffirmed certain understandings on metters raised in the USRO letter which had been reached between USRO, the Director of the EPA, and representatives of the interested Member Countries. This reply made the agreement regarding the implementation of the Third Country Training Program in Europe effective as of its date, June 12, 1958. Copies of the USRO letter and its two Annexes are included herewith as attachment "A". A copy of the Secretary General's reply is included as attachment "B".

Subsequent to the May 12 letter, ICA has made a further proposal to the OEEC which suggests that EPA organize a three-phase project to include (1) compilation of an inventory (with limited evaluation) of training and educational facilities in the OEEC Member Countries which are able to make contributions to the training needs of less developed countries (2) a study of the measures by which existing European institutions could be enabled to increase their ability to meet these training needs, and (3) consultations with the governments of less developed countries, their USOM's and with regional organizations such as CCTA and FAMA, to obtain information on training needs, to provide information on training facilities in OEEC countries, and to encourage exchange of information and utilization of OEEC country facilities. USOM's will be kept informed by USRO and/or ICA/W of progress on the development of this project.

III. ASPECTS OF PARTICULAR SIGNIFICANCE TO USOM TRAINING OFFICERS

1. USOM Training Officers and other interested USOM officials should of course read attachments "A" and "B" in their entirety and familiarize themselves with the contents. Any questions should be addressed to USRO by airgram, repeated to ICA for information.

2/ It should be noted that an inventory of European training facilities is to be prepared by EPA as part of the most recent ICA proposal. When completed, it will be made available to USOM's (and country governments), on a world-wide basis. This inventory should be of material assistance in the development of both the overall country training program (Participant element) and the proposed programs for individual participants. (PIO/P's)

3. In connection with the actual assumption by EPA of its Third Country Training Responsibilities, certain arrangements at the working level have been made by USRO and EPA. Those having procedural and other implications to USOM's are as follows:

a. Implementation of Training Projects

All new projects initiated after July 1, 1958 will be administered under EPA supervision, regardless of country of origin, or country of training. All projects initiated prior to July 1, 1958 will be handled by USRO (TCD/Training Branch) under existing bilateral agreements and ad hoc arrangements in those countries where USRO has had operations responsibility. Initiation of a project is meant to include the receipt by TCD/Training Branch of country program lists, exploratory airgrams, cables, etc. Exceptions to the above are requests for training in Spain, France, Greece, Turkey and Yugoslavia, where third country training is presently administered by USOM's or small ICA units. Any training projects initiated prior to July 1, for training in these five countries will continue to be handled by the USOM or ICA unit. Projects initiated after July 1 for training in these countries should be communicated by the originating USOM to USRO, for implementation through EPA channels. USOM's and ICA offices in these countries should contact USRO/TCD/TB on all procedural questions.

OEEC Member Countries

Austria	Iceland	Portugal
Belgium	Ireland	Sweden
Denmark	Italy	Switzerland
France	Luxemburg	Turkey
Germany	The Netherlands	United Kingdom
Greece	Norway	

Countries Having Special OEEC Status

Spain Yugoslavia

USRO can also arrange for training in Finland, which is not an OEEC member Country.

b. Communications, Correspondence, and Documentation

USOM's should correspond directly with USRO/TCD/TB concerning projects initiated prior to July 1, 1958 where training occurs in the following countries: Austria, Belguim, Denmark, Germany, Iceland, Ireland, Italy, Luxemburg, The Netherlands, Norway, Portugal, Sweden, Switzerland and the United Kingdom. Cables and airgrams should be addressed to USRO in the TOECO series.

USOM's should correspond with USOM's or ICA units in Spain, France, Greece, Turkey and Yugoslavia for all projects initiated before July 1, 1958 and with USRO/TCD/TB for all projects initiated after July 1, 1958, i.e. any project initiated after July 1, 1958 for implementation in any OEEC member

country should be channeled through USRO/TCD/TB: information copies of correspondence and requests for training in the above five countries should be addressed to the USOM or ICA unit in the country by the USOM in the country of origin. In other words, any project initiated after July 1, 1958 for implementation in any OEEC member country should be channeled through USRO. However, originating USOM's requesting training in the above 5 countries after July 1 should forward information copies of all correspondence to the USOM or ICA unit in these 5 countries.

USOM's should draft all project documentation including PPA's PIO/T's, bio-data, etc. without establishing specific third countries as an absolute requirement. The quality of training in Europe will be enhanced if OEEC/EPA technical personnel are permitted to draw upon their professional experience and knowledge of European facilities in developing decisions on a Europe-wide basis in the same manner as ICA/W for training in the United States. However, if the originating USOM or the originating country government desires the training in a specific third country or specific third country institution, industrial firm, etc., this should be included as a suggestion for EPA guidance. USOM's should be encouraged to give as much detail as possible concerning the objectives and nature of the training desired, while permitting EPA to as much freedom as possible in determining where that training can be best obtained.

4. Financial Arrangements

At present, necessary vouchers and financial documentation are submitted to USRO upon completion of individual training programs. If they appear to be complete and in conformance with the program, they are administratively approved by USRO/TCD and sent to the ICA European Area Controller for final review and payment. The European Area Controller then transfers this charge from his books to those of the originating USOM.

Until further notice, the above procedure will be continued. As soon as OEEC/EPA has gained sufficient experience, EPA vouchers will be submitted directly to the originating USOM for review and payment. It is now considered that December 31, 1958 is the earliest date by which this change could be made effective.

USOM's should give participants $100 advance maintenance allowance to minimize problems during the transition period.

ATTACHMENT "A"

May 12, 1958

Mr. Rene Sergent
Secretary General
OEEC
3, Rue Andre-Pascal
Paris 16, France

Dear Mr. Sergent:

May I refer to my letter of August 21, 1957, in which I invited the cooperation of the Organization for European Economic Cooperation in that part of the Technical Cooperation Program of the International Cooperation Administration which is known as Third Country Training.

As you will recall, my letter described how, under this program, training is provided for persons coming from "First Countries" in countries other than the United States. These countries of training are called "Third Countries". The present letter sets forth the terms and conditions under which the European Productivity Agency of the OEEC would undertake the implementation of the United States Third Country Training Program in Europe.

I have noted with satisfaction the generally favorable reactions to this proposal of an ad hoc Group of Heads of Delegations (see document C(58)58) and of the Governing Body of the EPA (EPA/GB/M(58)1 paras. XXX 17-20 and Annex). It remains to insure formal agreement which will enable ICA (An Agency of the United States Government.) through USRO on the one hand, and the OEEC, acting for and through the EPA, on the other hand, to implement the proposal made in my letter of August 21. This letter, together with its Annexes sets out the terms and conditions of such an agreement.

I understand that in taking over this responsibility, the relevant activities will be conducted by the OEEC/EPA in a manner which will permit achievement of the quality standards of performance consistent with those which govern the conduct of the Technical Cooperation projects sponsored by the United States in other areas. The planning and implementation activities will be governed by the terms of the present letter and by its Annexes I and II.

A. General Provisions

1. Full responsibility for programming and implementation of the Third Country Training Program in Member Countries and, where possible, in countries associated with the OEEC, will be vested in OEEC/EPA. USRO will maintain close liaison with the OEEC/EPA for the purpose of carrying out advance planning for implementation of the Third Country Training Program in Europe. All requests from USRO in this connection will be XXXXXX reviewed jointly by OEEC/EPA and

DECLASSIFIED Authority NND 971263 By ____ NARS, Date ____

ATTACHMENT "A" cont.

USRO to determine their acceptability and to insure that they are clear in their objectives and specific in stating the nature of the training desired.

2. Such bilateral agreements as are in operation between USRO and the competent authorities in the Member Countries of the OEEC will be terminated. They will be replaced by administrative arrangements, made in conformity with Annexes I and II to this letter, between the OEEC/EPA and Third Countries willing to participate in this program. The OEEC/EPA will progressively assume the responsibility relinquished by the United States authorities in the various countries, such assumption taking place as rapidly as operational conditions permit.

B. Administrative Arrangements

1. Where practicable, OEEC/EPA officials will meet incoming participants and review with them the program arranged for them in consultation with appropriate agencies in the Third Country, explaining the procedures and the trainee's responsibilities while undergoing training in that country. Should it appear that any modifications in the training program are desirable such changes will be made by mutual agreement between the OEEC/EPA and the agency concerned. In no event, however, will ~~XX~~ the OEEC/EPA agree to significant changes without the consent of USRO.

2. Where practicable, OEEC/EPA officials will meet again with the participants upon completion of their training program in the country for the purpose of evaluating the relationship between the training received and the economic development projects in the originating First Country which necessitated such training; for determining the nature of any other assistance necessary for the satisfactory completion of the ICA-financed Projects; for assuring suitable travel arrangements; and for reporting to ICA on the results of the training. USRO will periodically review with OEEC/EPA officials the performance of these tasks and when necessary, will act jointly with the OEEC/EPA to assist in their fulfillment.

3. Where desirable, USRO officials will meet with participants in the Third Countries to observe their training.

4. In addition to the participant training mentioned above, it is anticipated that requests from originating First Countries for the services of European consultants or technicians will be received by USRO. Such requests will be transmitted to the OEEC/EPA. The OEEC/EPA in cooperation with the National Agency concerned, will arrange for an ICA-financed contract to be signed between the Third Country consultant or technician and the appropriate country agency.

DECLASSIFIED Authority NND 817863 By ____ NARA, Date ____

ATTACHMENT "A" cont.

C. Financial Arrangements

1. Specifications of the services which may be requested under this Agreement, and details of the compensation for such services, are set forth in Annexes I and II which are an integral part of this letter.

2. While the financing of the direct costs of Third Country Training, as specified in Annex II to this letter, will be undertaken by the ICA under the terms and conditions of this letter and its Annexes and work authorizations issued hereunder, it is understood that indirect costs of administration will be borne by the OEEC/EPA as part of its general administration expenses. The OEEC/EPA will make the required disbursements of direct costs subject to reimbursement by the ICA, in accordance with the procedures outlined in Annex II.

3. Pre-departure costs, costs of travel from the originating First Country to the Third Country and return, or other costs normally payable in the currency of the First Country or other non-third country local currencies, will be borne directly by the ICA or by the originating First Countries.

4. The ICA further undertakes to arrange for participants' health and accident insurance coverage in connection with their training in Europe.

D. Commencement and Termination

1. The terms and conditions governing the transfer of Third Country Training responsibilities from ICA to the OEEC/EPA will become effective upon the receipt of a reply from you indicating that the foregoing arrangements are acceptable to the OEEC/EPA. The ICA will consider that this letter, with its Annexes, and your reply thereto constitute an Agreement between the two parties on the subject of this letter. This Agreement may be terminated by notice by either party, providing that such notice is given in writing 90 days before the anticipated termination. In such a case, arrangements will be jointly agreed upon for liquidating work in progress at that time. The terms and conditions of this letter, and its Annexes, may be amended or modified in mutual agreement by the Parties.

2. If the OEEC/EPA is prepared to assume the responsibilities and functions outlined in this letter and its Annexes, I should appreciate your advising me of its decision.

Sincerely yours,

/s/
John G. McCarthy

ANNEX I

Procedural and Administrative Arrangements

USRO will make available to OEEC/EPA the relevant ICA Manuals of Operation dealing with procedural and administrative matters in the field of technical cooperation projects sponsored by the U. S. Government.

Specifications of Services which may be Requested in Work Authorizations

A. Programming and Operation of Third Country Training Projects Including:

1. Disbursement to project participants of subsistence allowance at rates prescribed by United States Government regulations.

2. Arranging transportation within the Third Country and/or reimbursing participants for transportation expenses incurred in accordance with United States Standardized Government Travel Regulations and other United States Government Regulations.

3. Employment of the services of training institutions, lecturers, interpreters, project managers and escorts, as required.

4. Supply of necessary printed material and training aids relevant to and in support of the specific training program.

B. Specification of Other Assistance Requested

1. Preparation of information material concerning training facilities in the Third Country.

2. Assistance in the employment by the United States Government of experts for service under United States Technical Cooperation Projects.

3. Preparation of individual project implementation reports as well as summary reports.

UNCLASSIFIED
Authority NND 947863
By ____ NARA, Date ____

ATTACHMENT "A"

ANNEX II

A. Financial Procedures

Written authorization is required for all disbursement of funds, and no training shall be initiated or services furnished or claim for compensation made except on presentation of such a document known as a "Work Authorization". Such Work Authorization will be issued by the Director, Technical Cooperation Division, USRO or by his duly authorized alternate, on the basis of information supplied by the originating U. S. Mission and the Third Country Government Agency, subject to acceptance of the project by the latter agency.

B. Details of Compensation for Service Rendered

The OEEC/EPA is authorized, subject to the provisions of Annex I, to make payments from its own funds and request reimbursement from ICA at rates stipulated for articles delivered and accepted or services rendered, as herein provided.

1. Subsistence allowance to participants:

   Per diem at the rates applicable to Third Country Training participants and computed in accordance with United States Standardized Government Travel Regulations. Information concerning current per diem rates will be furnished by ICA.

2. Travel of Participants:

   Reimbursement of actual cost of transportation as authorized.

3. Services of Training Institutions, Lecturers and Instructors:

   Reimbursement of actual cost as authorized but only (a) when in payment of a regularly established fee charged by the training institution, lecturer or instructor to all persons obtaining the services irrespective of their sponsorship, and (b) when a special program, different from and more expensive than that customarily provided by the training institutions, is specifically agreed upon in advance by ICA.

4. Services of Project Managers, Interpreters and Escorts:

   Information concerning fees will be furnished by ICA.

ATTACHMENT "A" cont.

ANNEX II cont.

5. Travel of Lecturers, Instructors, Interpreters, Project Managers and Escorts:

   a. Reimbursement of actual cost of transportation in accordance with United States Standardized Government Travel Regulations.

   b. Per diem at the rates applicable to Third Country Training participants, and computed in accordance with United States Standardized Travel Regulations.

6. Printed Material and Training Aids:

   Reimbursement of actual cost as authorized by ICA pursuant to applicable ICA M.O. Regulations.

7. Miscellaneous

   Reimbursement of actual cost of telephone and cable charges and such other miscellaneous expenses as are required in the implementation of projects.

C. Details of Reimbursement Procedures

The OEEC/EPA will, upon receipt of each work authorization that is issued, make the authorized payments, from its own funds and request reimbursement at a later date. The work authorization will be issued to show the amounts in dollars which will represent the maximum amount of dollars that may be reimbursed to the OEEC/EPA under a work authorization.

Requests, by the OEEC/EPA, for reimbursement will be made upon submission of the proper documentation to the ICA, European Area Controller, care of the American Embassy, Paris, as follows:

The OEEC/EPA will report the disbursements by the submission of a voucher, Standard Form 1146, in an original and three copies supported by receipted vendors invoices or receipts appropriately detailed as to the quantity, description, and price for the disbursement made.

UNCLASSIFIED Authority NND 947863 By NARA, Date

ATTACHMENT "B"

June 12, 1958

Dear John:

I am writing to acknowledge herewith, on behalf of the Organization for European Economic Cooperation, the receipt of your letter of May 12, 1958, relating to the co-operation of the Organization in that part of the Technical Cooperation Program of the United States International Cooperation Administration, which is known as the Third Country Training.

This letter was, as you are aware, considered by the Council of the Organization at its meeting held on May 30. The Council welcomed the proposal which is the subject matter of your letter and in accordance with which the European Productivity Agency of the Organization should undertake the implementation of the United States Third Country Training Program in Europe.

It may be useful to record the following understandings on matters raised in your letter, which have been reached between you, the Director of the European Productivity Agency and representatives of the Member countries interested.

(a) Nothing in your proposal diminishes or changes the present responsibility of Member countries for the training courses or other similar programs in their own countries. Arrangements agreed with each country individually, by an exchange of letters or otherwise, will govern the division of tasks between the Agency and the country concerned.

(b) As regards the administrative costs, which will be borne by the agency, these will, of course, be subject each year to approval by the Governing Body of the Agency according to the EPA Project Rules. The necessary staff will form a part of the establishment proposed by the Director, and agreed by the Council, on the advice of the Governing Body, and of the Budget Committee.

(c) Where requests from First Countries for the services of a consultant or technician from a Member country are transmitted to the agency by USRO, the Agency will furnish names of qualified and available consultants or technicians acceptable to USRO, to the First Country and to the Third Country. This search for suitable applicants will be made by the Agency in consultation with the Member country or countries concerned and no name will be put forward without their approval and agreement. The resulting contract will be between the individual consultant (or, on occasion, his organization, firm,

UNCLASSIFIED
By NARA Date 12/9/83

ATTACHMENT "B" cont.

or department) and the First Country, and the responsibility of the Agency for the results of the work will not be engaged.

(d) The scales of per diem allowances, travelling expenses, etc. referred to in Annex I A to your letter apply only to participants from First Countries under the Third Country Training Program, and not to participants in other training activities which may be contemplated under the program of the Agency, not to consultants or staff of the Agency or the Organization, who may have to travel in connection with the Third Country Training Program. The latter remain governed by the EPA Project Rules and by the OEEC Staff Regulations respectively.

(e) It is understood that paragraph B (i) of Annex I to your letter refers to the making available of information ~~xxx~~ material concerning training facilities in the Third Country concerned, and otherwise assisting in the obtaining of such material.

As you are aware, the Council authorized me to accept, on behalf of the Organization and for the European Productivity Agency, the terms, conditions, and procedures set out in your letter which will, together with the Annexes thereto and this letter, constitute an Agreement between the Organization and the United States International Cooperation Administration regarding the implementation of the Third Country Training Program in Europe.

Yours sincerely,

SMITH

OFFICE OF THE ASSISTANT ECONOMIC COORDINATOR
FOR TECHNICAL COOPERATION
UNITED NATIONS COMMAND
OFFICE OF THE ECONOMIC COORDINATOR FOR KOREA

SUBJECT: Itinerary for Third Country Training Team - Thailand

The following itinerary is announced for the following three participants in the field of study indicated below:

National Economic Planning

Mrs. Nidabha Petcharabul, Controller
Mrs. Somchitt Chomchaiya, Administrative Division
Mr. Piew Peter Phusavat, Program Officer

Purpose: The Government of Thailand is making special efforts to gear its economic planning machinery into a national development program in order that development can be hastened. In order to accomplish this objective, however, it is essential that trained personnel be available to implement the program. This project is to help provide the training required.

Program: Observation for a period of 2 months in Manila, Tokyo, Seoul, Taiwan, and Saigon. These officials presently are key personnel in the Thai Technical and Economic Committee, which is the Thai Government body through which all economic aid is proposed and programmed. There is developing in Thailand certain proposals for a new central planning agency which would affect the structure and present operations of the Thai Technical and Economic Committee. These officials are anxious to observe the organization and general responsibilities of comparable activities in Manila (PHILCUSA Prior to its inclusion in NEC), Taiwan and comparable vehicles in South Korea and Tokyo. In the case of Tokyo, they are particularly interested in observing the role of the Economic Stabilization Board and Productivity Center. In Saigon they will be interested in the Central Planning Agency or approximation of such an agency. The group should spend approximately 2 weeks in each of the host countries.

Control Officer: Mr. Bernheisel, TC-TT
