1. The OEC Veterinarian, in May 1956, in cooperation with the Armed Forces Laboratory in Tokyo, collected hog diaphragms over the course of several weeks from a Seoul slaughterhouse and forwarded them to the laboratory in Japan for an informal survey of the possibility of trichinosis in Korea.

Results were negative.

2. The Veterinary Section of the Korean Ministry of Agriculture knows of no reported cases but feels it is present. It has made no formal investigations.

3. The faculty of the Seoul Veterinary College feels it is present but have no studies that definitely prove its presence or absences.

4. The Parasitology Department of the Seoul University Medical College reported no cases to their knowledge in humans.
